Additional Findings: The eye appears generally healthy.

■ Recommendations

■ **Nutrition Advice**

- ■ Continue your balanced diet rich in iron and vitamins
- ■ Vitamin A for eye health: Carrots, sweet potatoes, pumpkin, eggs
- ■ Stay hydrated and maintain a colorful plate with diverse vegetables

■ **Lifestyle Recommendations**

- ■■ Follow the 20-20-20 rule: Every 20 mins, look at something 20 feet away for 20 seconds
- ■ Get 7-8 hours of quality sleep for eye recovery and overall health
- ■■ Wear UV-protective sunglasses when outdoors
- ■ Use blue light filters on digital devices, especially at night
- ■ Avoid rubbing your eyes to prevent irritation and infection
- ■ Avoid smoking as it increases risk of cataracts and macular degeneration
- ■ Exercise regularly to maintain healthy blood circulation to the eyes

■ **Medical Consultation**

- Routine checkup is sufficient.
- ■■ Routine eye check-up with an optometrist is recommended annually

■ **Follow-up Schedule**

- Priority: Low - Routine
- Next scan recommended in: 3-6 months

Symptoms to monitor:

- Blurred or decreased vision
- Eye pain or discomfort
- Persistent redness or discharge
- Yellowing of skin or eyes
